

COMMERCIAL MACHINES

ABOUT US

We are a coffee roaster based between Amsterdam and Kenya. We specialise in specialty coffees sourced from small-holder farms in East-Africa. Our founder, Stean, grew up in the region and is passionate about creating sustainable change to the coffee industry through direct payment schemes, low emission roasting and electric bike delivery in Amsterdam.

OFFICE COFFEE SET-UP INSTALLATION

We believe that a great centrepiece of a working environment is a relaxing space to enjoy a warm drink with co-workers. This is why we offer brew-station consultation for business spaces, barista accessory supply and complimentary barista training for staff members.

OUR SERVICES

WHOLESALE COFFEE SUPPLY

We offer a variety of roasts for multiple brewing styles. Whatever quantity of coffee you require for your business, we can assure prompt e-bike delivery within Amsterdam. Information about each roast is available on our website.

For wholesale, coffee can be bought regularly using direct debit. Depending on the specific needs of your business, we can tailor a supply agreement and discounted pricing.

BARISTA TRAINING

We believe that 'Good coffee' is a marriage between quality ingredients and masterful preparation. So, to ensure a standard to the preparation and service of our product we include complimentary barista skills training in the price of our coffee.

MAINTAINANCE AND SERVICING

The coffee machines we offer are designed to last for a long time in high intensity service environments; but their durability relies on upkeep and sufficient cleaning.

To ensure your machine will last and will not become damaged, have it checked and serviced at least once a year. The water filter and gaskets will need to be replaced once annually.

If you have concerns about the functionality of your machine, email us at orders@steansbeans.com to organise servicing. If your grinder or coffee machine is suddenly not working as it should, call us on (+31) 6 1104 0992 and we will try to organise a solution as fast as possible to get you back up and running.

Nuova Simonelli

APPIA LIFE XT

The Nuova Simonelli Appia Life is a robust machine that requires little maintenance with a lot of machine for the money that you pay.

The Appia's sturdy build recognises the reality of a fast paced service environment; this is evident in it's bold dosing buttons, its lever controlled steam wands and the consistency of the coffee it puts out.

We have chosen to promote this machine because we believe it would be a great machine for our customers looking to start out their coffee bars.

La Marzocco undoubtedly makes the most reliable, consistent espresso machines, that also are beautifully hand built.

For Steans Beans its paramount that the right equipment is used to brew our speciality coffee to ensure the best possible result. We therefore have chosen the Linea S as a machine that provides quality, consistency and a lot of value when compared to other brands in this category. Prices listed are exclusively for our Horeca partners that work with our coffee.
